## Combo Pizza Warmer and Humidified Merchandiser Cabinet

Creating the most appealing pizza, to last throughout the sales takes the right temperatures, air movement and moisture. The combo oven and holding cabinet helps you cook and store your pizzas to create the ideal product. Store up to 4 pizzas that are 14" max in diameter on the rotating rack. Also included are an adjustable timer, capped tube thermometer and reinforced stringers across each shelf.

- 1880 watts
- 28"D x 24"W x 43"H

Starting with only the highest quality ingredients, every pretzel is baked and hand twisted under the supervision of a certified master baker. With the flavor and moisture sealed in the package, our pretzels are soft, moist and full of flavor every time. And because they're NEVER FROZEN, you don't have to worry about serving a pretzel with a cold center.

Pretzels ship ready to heat and serve in high quality individual packages. With our patent-pending process, our pretzels arrive pre-seasoned with salt or cinnamon and sugar, so you spend less time preparing and more time selling. Pretzel Haus pretzels are exceptionally versatile and can be warmed in virtually any type of warmer (Microwave, convection oven, standard foodservice warmer, toaster oven, etc.), and in a very short period of time.

Shelf-stable pretzels also do not require freezers or humidifiers that cost money and take up valuable concession space. No more throwing away pretzels that arrive broken or dry out during the day! Your pretzel holding time will be extended dramatically from a few hours to WEEKS.
